Nomenjanahary Razafindriatsara

has successfully completed the online Specialization

Learn to Code with Rust

Congratulations on completing the "Learn to Code with Rust" course! You've successfully mastered the fundamentals of the Rust programming language, including key concepts such as variables, mutability, data types, and control flow. You've also gained a deep understanding of Rust's unique features, including ownership, borrowing, and memory safety. Through hands-on projects, you've developed the skills to handle error management, work with iterators and closures, and write robust tests. Additionally, you've explored Rust's randomness capabilities using the rand crate to integrate random behavior into your programs. With these skills, you're now equipped to build efficient and safe applications using Rust. Well done on your achievement!
